# NINJA thirsti™max

CUSTOM HYDRATION SYSTEM

# QUICK START GUIDE

**+ RECIPES**

**GET STARTED**

# BEFORE YOUR FIRST DRINK

---

## RUN A RINSE CYCLE ON YOUR NINJA THIRSTI™

**ALWAYS** ensure the Mixing Chamber is installed for system to operate.

1. Place a large cup on the drip tray.
2. Fill the Water Reservoir with ice to the 6 oz line and cold filtered water to the 18 oz line. Place on the dock.
3. Select “still” by toggling the  button.
4. Select 12 by toggling the  button.
5. Press the  button to start the Rinse Cycle.

**NOTE:** The system will dispense 6 oz two times. Listen for the end chime to know when dispense is complete.
6. Dispose of dispensed water once the Rinse Cycle is complete.

**FLAVORED WATER DROPS CARRIAGE**

**NINJA THIRSTI™  
60 OZ WATER RESERVOIR  
WITH COLD WATER  
INDICATOR**

**ICE PRESS**

**REMOVABLE  
MIXING CHAMBER**

**NINJA THIRSTI™  
60 L CO<sub>2</sub> CANISTER**

Makes up to 100  
drinks (12 oz each).

**REMOVABLE  
CUP TRAY**

**CO<sub>2</sub> ACCESS DOOR**

**FLAVORED WATER DROPS STARTER PACK**

Includes a variety of Flavored Water Drops.

**ALWAYS** dilute Flavored Water Drops through the  
Ninja Thirsti™ Max Custom Hydration System.

*Flavor and quantity will vary per model.*

**NOTE:** Colors, components, and functions may vary by model.

# SETTING UP YOUR NINJA THIRSTI™ MAX

---

## 1. INSTALL CO<sub>2</sub> CANISTER

Remove the tamper seal and plastic cap from the top of the CO<sub>2</sub> canister.

**NOTE:** Save the black CO<sub>2</sub> cap for canister return.

Swing out the CO<sub>2</sub> door at the back of the unit. Pull out the CO<sub>2</sub> collar.

Install canister into collar by twisting to the right. **TWIST UNTIL TIGHT.**

---

## 2. FILL AND DOCK WATER RESERVOIR

Remove the Ice Press Lid from the reservoir and set aside.

Fill the reservoir with ice to the 18 oz line and cold filtered water to the 60 oz line.

Place the Ice Press Lid back on the reservoir. Gently push the plunger down to chill water for maximum carbonation.

Place the chilled Ice Press Reservoir onto the dock.

**NOTE:** Ice Press Lid will improve carbonation results by cooling water quickly.

### 3. OPEN ONE OR TWO FLAVORED WATER DROPS

Tear off **only the top** tamper seal. Entire cap should be exposed.

Flip cap all the way back to the open position.

**NOTE:** Store Flavored Water Drops in a cool, dark place to further maintain aroma, color, and taste.

### 4. INSTALL FLAVORED WATER DROPS

Flip Flavored Water Drops upside down into the flavor carriage.

Gently push down on both Flavored Water Drops bottles to ensure they are locked in place.

## CUSTOMIZE YOUR BEVERAGE ON THE NEXT PAGE

# SO MANY WAYS TO PERSO

## CHOOSE A FIZZ

Run a Chill Cycle for best carbonation experience. A Chill Cycle can be completed by making a 6 oz still drink with ice cold water. Before dispensing, ensure Cold Water Indicator is bright blue.

**NOTE:** Number of sparkling levels will vary by model.

**STILL**

**LOW FIZZ**

**MEDIUM FIZZ**

**HIGH FIZZ**

## SELECT A SIZE

Don't grab your drink until you hear the chime. The system dispenses 6 oz at a time.

Use **(single)** to select 6, 12, and 18 oz dispense sizes.

Use **(multi)** to select 1 L dispense size.

**TIP:** Elevate cup tray to accommodate smaller cups and glasses.

# NALIZE A SINGLE FLAVOR

## ADJUST FLAVOR STRENGTHS

Flavor strength buttons correlate to the Flavored Water Drops directly above.

**NOTE:** When creating a combo drink (2 flavors), the system will dispense half the amount of flavor, per Flavored Water Drops. This prevents too much flavor in one drink.

**UNFLAVORED**  
SPARKLING WATER

**CLASSIC**  
WELL-BALANCED  
FLAVOR

**BOLD**  
MORE FLAVOR  
AND AROMA

**PRESS START**

## ICE PRESS

### ICE PRESS

Keep ice at the bottom to chill water for maximum carbonation.

**THE BRIGHTER  
THE BLUE, THE  
COLDER & FIZZIER  
THE DRINK**

Cold Water Indicator turns blue when water reaches the ideal temperature for carbonation.

When not in use, fill and store the water reservoir in the refrigerator to guarantee cold, ready-to-carbonate water.

# TROUBLESHOOTING

---

## WHY IS THE SPARKLING BUTTON ORANGE?

The  button turns orange to indicate low CO<sub>2</sub>. When the button turns orange, there is enough CO<sub>2</sub> for approximately 10–25 drinks (12 oz each). Install a new CO<sub>2</sub> canister and hold the  button for 2 seconds to reset the indicator.

## DID YOU END YOUR CYCLE BY PRESSING START?

If you pressed the  button during a cycle, the product will prompt you to drain the system. See below for instructions on completing a Drain Dispense.

## WHY IS "DRAIN" ORANGE?

The last dispense cycle was interrupted and some water must be drained from the unit. Place a cup under the nozzle and press the  button to allow a Drain Dispense to complete. The unit must run a Drain Dispense before another drink can be made. It will only take a few seconds.

## WHY IS THE MIXING CHAMBER LIGHT BLINKING?

This means the Mixing Chamber is not installed or not properly installed. Mixing Chamber must be installed to dispense a drink.

# TIPS & TRICKS

---

## TIPS

- Fill the water reservoir(s) with ice for immediate use or store the reservoirs in the refrigerator. Chill overnight to reach optimal cold temperature.
- When the  button turns orange, there is enough CO<sub>2</sub> remaining in the canister for approximately 10–25 more 12 oz drinks.
- **DO NOT** freeze the water reservoir.
- Always add ice after your beverage has dispensed to maintain carbonation level.
- There is a 40% strength increase from classic to bold flavor strength.
- After 10 minutes of no activity, the unit will enter sleep mode. Press any button to turn unit back on.
- Unit will always default to previous settings.
- The temperature indicator in the water reservoir will turn blue when water is at the ideal carbonating temperature.

# REPLENISH

## Flavored Water Drops Replenishment

Buy more to never have a day without flavor. Flavored Water Drops should be replaced after 30 days of being opened.

## CO<sub>2</sub> Refill Club

Join to never miss a day of carbonation. Each 60 L CO<sub>2</sub> canister makes 100 carbonated drinks (12 oz each).

# ACCESSORIZE

## 48 oz & 60 oz Water Reservoirs

Additional Water Reservoirs kept in the refrigerator allow for always cold, ready-to-carbonate water.

## Ninja Thirsti™ Travel Bottle

Colder & fizzier drinks for longer.

## Ninja Thirsti™ 360° Flavored Water Drops Storage

Hold up to 8 bottles of Flavored Water Drops in the 360° storage rack for easy access to all flavors.
