NINJA thirsti™

CUSTOM HYDRATION SYSTEM

QUICK START GUIDE

+ RECIPES

GET STARTED

BEFORE YOUR FIRST DRINK

RUN A RINSE CYCLE ON YOUR NINJA THIRSTI™

ALWAYS ensure the Mixing Chamber is installed for system to operate.

1. Place a large cup on the drip tray.
2. Fill the Water Reservoir with ice to the 6 oz line and cold filtered water to the 18 oz line. Place on the dock.
3. Select “still” by toggling the  button.
4. Select 12 by toggling the  and  button.
5. Press  button to start the Rinse Cycle.

NOTE: The system will dispense 6 oz two times. Listen for the end chime to know when dispense is complete.
6. Dispose of dispensed water once the Rinse Cycle is complete.

**NINJA THIRSTI™
48 OZ WATER RESERVOIR
WITH COLD WATER
INDICATOR**

ICE PRESS

**FLAVORED WATER
DROPS CARRIAGE**

**NINJA THIRSTI™
60 L CO₂ CANISTER**
Makes up to 100
drinks (12 oz. each).

FLAVORED WATER DROPS STARTER PACK

Includes a variety of Flavored Water Drops.

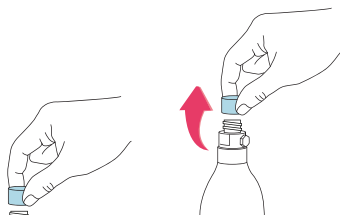

ALWAYS dilute Flavored Water Drops through the
Ninja Thirsti™ Custom Hydration System.

Flavor and quantity will vary per model.

NOTE: Colors, components, and functions may vary by model.

SETTING UP YOUR NINJA THIRSTI™

1. INSTALL CO₂ CANISTER

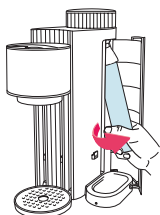

Remove the tamper seal and plastic cap from the top of the CO₂ canister.

NOTE: Save the black CO₂ cap for canister return.

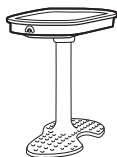

Swing out the CO₂ door at the back of the unit. Pull out the CO₂ collar.

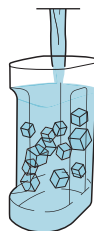

Install canister into collar by twisting to the right. **TWIST UNTIL TIGHT.**

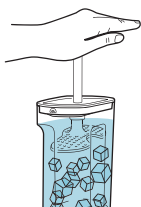

2. FILL AND DOCK WATER RESERVOIR

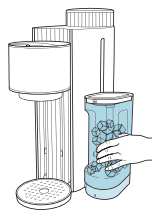

Remove the Ice Press Lid from the reservoir and set aside.

Add ice to the 18 oz line. Fill the Ice Press Reservoir with cold filtered water to the 48 oz line.

Place the Ice Press Lid back on the reservoir. Gently push the plunger down to chill water for maximum carbonation.

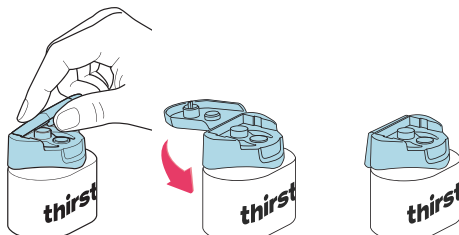

Place the chilled Ice Press Reservoir onto the dock.

NOTE: Ice Press Lid will improve carbonation results by cooling water quickly.

3. OPEN ONE OR TWO FLAVORED WATER DROPS

Tear off **only the top** tamper seal. Entire cap should be exposed.

Flip cap all the way back to the open position.

NOTE: Store Flavored Water Drops in a cool, dark place to further maintain aroma, color, and taste.

4. INSTALL FLAVORED WATER DROPS

Flip Flavored Water Drops upside down into the flavor carriage.

Gently push down on both Flavored Water Drops bottles to ensure they are locked in place.

CUSTOMIZE YOUR BEVERAGE ON THE NEXT PAGE

SO MANY WAYS TO PERSONALIZE

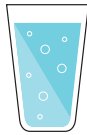

CHOOSE A FIZZ

Run a Chill Cycle for best carbonation experience. A Chill Cycle can be completed by making a 6 oz still drink with ice cold water. Before dispensing, ensure Cold Water Indicator is bright blue.

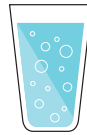

NOTE: Number of sparkling levels will vary by model.

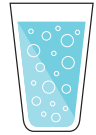

STILL

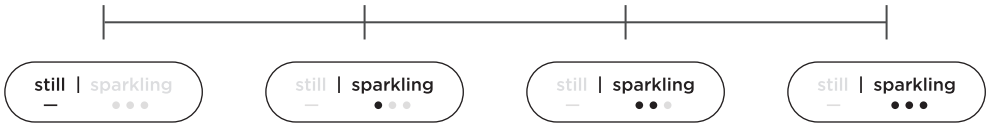

LOW FIZZ

MEDIUM FIZZ

HIGH FIZZ

SELECT A SIZE

Don't grab your drink until you hear the chime. The system dispenses 6 oz at a time. Use < and > button to select dispense size.

TIP: Elevate cup tray to accommodate smaller cups and glasses.

ANALYZE A SINGLE FLAVOR

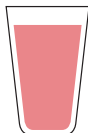

ADJUST FLAVOR STRENGTHS

Flavor strength buttons correlate to the Flavored Water Drops directly above.

NOTE: When creating a combo drink (2 flavors), the system will dispense half the amount of flavor, per Flavored Water Drops. This prevents too much flavor in one drink.

PRESS START

ICE PRESS

Keep ice at the bottom to chill water for maximum carbonation.

ICE PRESS

**THE BRIGHTER
THE BLUE, THE
COLDER & FIZZIER
THE DRINK**

Cold Water Indicator turns blue when water reaches the ideal temperature for carbonation.

When not in use, fill and store the water reservoir in the refrigerator to guarantee cold, ready-to-carbonate water.

TROUBLESHOOTING

WHY IS THE SPARKLING BUTTON ORANGE?

The  button turns orange to indicate low CO₂. When the button turns orange, there is enough CO₂ for approximately 10–25 drinks (12 oz each). Install a new CO₂ canister and hold the  button for 2 seconds to reset the indicator.

DID YOU END YOUR CYCLE BY PRESSING START?

If you pressed the  button during a cycle, the product will prompt you to drain the system. See below for instructions on completing a Drain Dispense.

WHY IS "DRAIN" ORANGE?

The last dispense cycle was interrupted and some water must be drained from the unit. Place a cup under the nozzle and press the  button to allow a Drain Dispense to complete. The unit must run a Drain Dispense before another drink can be made. It will only take a few seconds.

WHY IS THE MIXING CHAMBER LIGHT BLINKING?

This means the Mixing Chamber is not installed or not properly installed. Mixing Chamber must be installed to dispense a drink.

TIPS & TRICKS

TIPS

- Fill the water reservoir(s) with ice for immediate use or store the reservoirs in the refrigerator. Chill overnight to reach optimal cold temperature.
- When the  button turns orange, there is enough CO₂ remaining in the canister for approximately 10–25 more 12 oz drinks.
- **DO NOT** freeze the water reservoir.
- Always add ice after your beverage has dispensed to maintain carbonation level.
- There is a 40% strength increase from classic to bold flavor strength.
- After 10 minutes of no activity, the unit will enter sleep mode. Press any button to turn unit back on.
- Unit will always default to previous settings.
- The temperature indicator in the water reservoir will turn blue when water is at the ideal carbonating temperature.

REPLENISH

Flavored Water Drops Replenishment

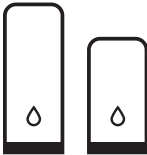

Buy more to never have a day without flavor. Flavored Water Drops should be replaced after 30 days of being opened.

CO₂ Refill Club

Join to never miss a day of carbonation. Each 60 L CO₂ canister makes 100 carbonated drinks (12 oz each).

ACCESSORIZE

48 oz & 60 oz Water Reservoirs

Additional Water Reservoirs kept in the refrigerator allow for always cold, ready-to-carbonate water.

Ninja Thirsti™ Travel Bottle

Colder & fizzier drinks for longer.

Ninja Thirsti™ 360° Flavored Water Drops Storage

Hold up to 8 bottles of Flavored Water Drops in the 360° storage rack for easy access to all flavors.
