

# NINJA FROSTVAULT™ GO

## TIPS AND TRICKS ON HOW TO LUBRICATE YOUR ZIPPER

### STEP 1: CLEAN ZIPPER

### STEP 2: DOT LUBRICANT

### STEP 3: OPEN AND CLOSE ZIPPER

### STEP 4: REPEAT AFTER STORAGE

**⚠ NOTICE:** Excessive lubricant may stain.

## MAINTAINING YOUR ZIPPER

The zipper is leakproof so it may need a little extra force to pull.

Clean your zipper with warm water after each use to clear dirt and debris. Then, add 4-5 dots of lubricant along the zipper teeth. Open and close the zipper 4 times to evenly distribute lubricant.

We recommend repeating this process if your cooler has been stored for a long period of time. Never force your zipper if it feels stuck.
