Ceramic Rocks

Specifically engineered and tested to use with your Ninja™ Fireside360™

Full Flame Control Propane Fire Pit

Hassle-free
smokeless flames
at the turn
of a dial, no
embers or sparks

Powerful Head-to-Toe Heater With 360-degree heat

Complete control, no guesswork
Easily control heat and flame
with 2 independent dials

GETTING STARTED

1. CERAMIC ROCKS

- Place the rocks into the bowl at top of the fire pit, covering the burner.

2. BATTERY INSTALL

- Open the the rear door and locate the yellow battery compartment on the back wall opposite the door.
- Install one AAA battery and replace the cover.

3. INSTALL TANK

- See tank install instructions in the Instruction Booklet for safe installation of the tank.

⚠ CAUTION: Let the fire pit cool completely before touching or moving.

HOW TO IGNITE

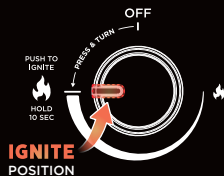

Open door and install battery on back wall before first use.

FOLLOW THESE IGNITION INSTRUCTIONS FOR BOTH THE HEAT AND FLAME DIALS

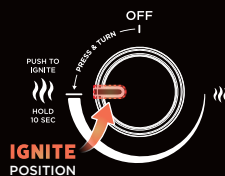

Press the dial in and turn it counterclockwise to the IGNITE position. You will hear a clicking sound when the igniter starts to spark.

Continue to press and hold the dial in place for 10 seconds. Then release the dial and adjust the flame or heat level to your preference. Ensure dial is turned to OFF position when not in use.
