More flavor. Less smoke.

After hundreds of hours of recipe testing, our chefs have paired your favorite foods with recommended temperature settings to maximize grill flavors while minimizing smoke.

Always use recommended oils

For less smoke, use oils with a high smoke point—like canola, avocado, vegetable, or grapeseed oil—instead of olive oil.

If you choose to cook ingredients at a higher temperature than recommended, it may result in more smoke and food having a burnt, acrid flavor.

MED / 450°F

Perfectly done with the Foodi, Smart Thermometer

How to place the thermometer

Once you've selected your cooking function, cooking temperature, protein type, and desired level of doneness, **insert the Foodi® Smart Thermometer into the thickest part of your protein** while the grill is preheating.

FOOD TYPE

PLACEMENT

CORRECT

INCORRECT

- Steaks Pork chops Lamb chops Chicken breasts Burgers Tenderloins Fish fillets
- Insert thermometer horizontally into the center of the thickest part of the meat.
- Make sure the tip of the thermometer is inserted straight into the center of the meat, not angled toward the bottom or top of it.
- Make sure the thermometer is close to (but not touching) the bone and away from any fat or gristle.

NOTE: The thickest part of the fillet may not be the center. It is important that the end of the thermometer hits the thickest part so desired results are achieved.

Dual Sensor Technology

The leave-in Foodi Smart Thermometer continuously monitors the internal temperature of food in two places for more accurate cooking results. The Smart Cook System lets you know when it's time to take your food off the grill and let it rest.

Whole chicken

- Insert thermometer horizontally into the thickest part of the breast, parallel to, but not touching, the bone.
- Make sure the tip reaches the center of the thickest part of the breast and doesn't go all the way through the breast into the cavity.

DO NOT use the thermometer with frozen protein or for cuts of meat thinner than 1 inch.

Ninja[®] Beef Doneness Guide

Everyone's idea of doneness differs. This guide shows you what you can expect from each of our preset beef doneness settings.

NOTE: Beef Doneness Guide is based on New York strip steak. Using different cuts of steak and different sizes can alter the outcome.

Carry-over cooking

Did you know that meat keeps cooking when you remove it from the grill?

To prevent overcooking, the unit will beep right before your food reaches the desired doneness, taking carry-over cooking into account. Transfer meat to a plate with the thermometer still inserted and allow protein to carry-over cook and rest for 3–5 minutes. **Skipping carry-over cooking and cutting into food** right away may result in a rarer level of doneness.

Reasons meat cooks differently

No two pieces of protein are alike, and, for that reason, they'll never cook the same. That's why we recommend paying close attention to the sizes of meat listed in our cooking charts. Here are some more tips to ensure a great cooking experience.

Proteins come in different shapes and sizes, which require different cooking times. If you are cooking proteins that are different sizes, insert one thermometer into the smaller cut, and the other into the larger cut, and the grill will tell you when each one is done.

For cuts 2 inches or thicker (e.g., filet mignon) we recommend selecting the lower temperature setting within the desired doneness category (e.g., Rare 1 instead of Rare 2).

For your convenience, cooking charts were created for use with cold meat, straight from the fridge.

For even juicier results

If time permits, let meat come to room temperature for about 30 minutes before cooking for a more juicy center.

Flavor-Building 101

Pumped-Up Marinades, Zesty Spice Rubs, and Elevated Dipping Sauces

For the following recipes, add all ingredients to a bowl and mix well.

These marinades and spice rubs call for coarse kosher salt– ensure you use that, and not fine-grain iodized salt.

Use spice rubs liberally. Season meat or vegetables generously and let sit at room temperature for 30 minutes before grilling—this will promote faster and even cooking.

Frozen to char-grilled

When grilling frozen meats, baste them liberally and consistently with the marinade of your choosing.

To get the best textures and flavors from frozen meat, season it with your favorite spice rub before grilling.

- 1 teaspoon kosher salt, divided
- 2 tablespoons brown sugar
- 2 tablespoons maple syrup
- 2 tablespoons unsalted butter, softened
- 2 teaspoons fresh thyme, for serving

DIRECTIONS

- 1 Rub the squash halves with vegetable oil, then season with pepper and $\frac{1}{2}$ teaspoon salt.
- **2** Insert pot in unit and close hood. Select ROAST, set temperature to 375°F, and set time to 45 minutes. Press START/STOP to begin preheating.
- **3** When unit beeps to signify it has preheated, place the squash halves skin side down in the pot, with the flesh sides facing up. Close hood and cook for 20 minutes.
- **4** Meanwhile, mix the brown sugar, maple syrup, butter, and remaining 1/2 teaspoon salt in a small bowl.
- 5 After 20 minutes, use silicone-tipped tongs to flip the squash halves so the flesh sides face down. Close hood and cook for 15 minutes.
- **6** After 15 minutes, flip the squash again so the flesh sides are up. Spoon the sugar mixture over the top of the squash. Close hood and cook for 5 minutes.
- 7 After 5 minutes, check on the squash. If more browning is desired, close hood and cook up to 5 more minutes, checking frequently.
- **8** When cooking is complete, transfer squash to a serving plate. Garnish with fresh thyme and serve immediately.

TIP If you'd like to cut back on the sugar in this recipe, omit the brown sugar.

TIP If your squash are too large, trim the sides off a bit in order to fit all 4 pieces in the pot.
