NINJA® ESPRESSO & COFFEE BARISTA SYSTEM CLEAN CYCLE INSTRUCTIONS

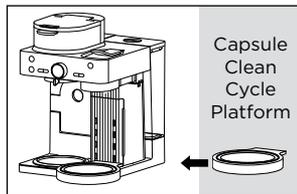

CAPSULE CLEAN CYCLE - Will take **2** hours to complete.

When to run a capsule clean cycle:

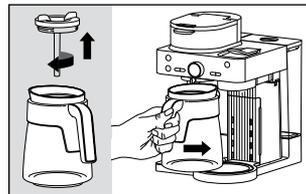

If typical capsules you brew are taking significantly longer time to brew, run a capsule clean cycle. If the clock is displaying “Add Wtr”, ensure the water tank is filled and fully seated, then try again. If “Add Wtr” persists, try running a water-only brew with the lever closed. If “Add Wtr” still persists, run a capsule clean cycle.

1. Ensure the lever is closed and no capsule is inserted. Remove the Adjustable Cup Tray from the brewer.

2. Place the Capsule Clean Cycle Platform on the front right base of the unit so that it sits on the countertop below the capsules spout.

3. Remove the lid from the carafe and place the carafe on the Capsule Clean Cycle Platform.

4. Fill the reservoir to the Full line with descaling solution* and water or white vinegar** and water.

clean

5. Once the water reservoir is filled, press the Capsule Button and then press the Clean button.
6. Press START BREW. A 2-hour countdown will begin on clock display.

7. Upon completion the brewer will beep and display “End”. Clean the reservoir and carafe. Flush the system by running three water-only Lungo brews.

*Descaling solution is available from ninjakitchen.com. Follow your solution's recommended concentration level.

**Fill the water reservoir to the Travel Mug line (16 oz.) with white vinegar, then add water to the Full line.

+CAUTION: DO NOT immerse coffee maker in any liquid.

NINJA® ESPRESSO & COFFEE BARISTA SYSTEM CLEAN CYCLE INSTRUCTIONS

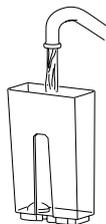

• **• GROUNDS CLEAN CYCLE** - Will take **75 minutes** to complete. •

How often to run a grounds clean cycle:

When the Intelligent Clean Cycle Indicator under the Grounds Button illuminates orange, run a grounds clean cycle.

1. Place the empty carafe beneath the brew basket.

2. Fill the reservoir to the Full line with either descaling solution* and water or white vinegar** and water.

clean

3. Once the water reservoir is filled, press the Grounds Button and then press the Clean button.

4. Press START BREW. Countdown will begin on clock display.

5. Upon completion the brewer will beep and display "End". Empty the carafe and place it back under the brew basket. Clean the reservoir and fill with fresh water up to the Full line. Now, flush the system by running a water-only Full Carafe Classic brew.

*Descaling solution is available from ninjakitchen.com. Follow your solution's recommended concentration level.

**Fill the water reservoir to the Travel Mug line (16 oz.) with white vinegar, then add water to the Full line.

+CAUTION: DO NOT immerse coffee maker in any liquid.
